

2008 Annual Report

July 2009

Prepared By

Missouri Department of Natural Resources  
Division of Environmental Quality  
Air Pollution Control Program

# 2008 Gateway Vehicle Inspection Program Annual Report

## **Reports and Data Required by Federal Rule**

Reports below are in the order of federal regulation. Federal requirements are in bold type and the Missouri Department of Natural Resources response follows each requirement. Responses that are data tables are found in the Attachments.

---

### **TITLE 40--PROTECTION OF ENVIRONMENT**

#### **CHAPTER I--ENVIRONMENTAL PROTECTION AGENCY**

##### **SUBCHAPTER C--AIR PROGRAMS**

#### **PART 51--REQUIREMENTS FOR PREPARATION, ADOPTION, AND SUBMITTAL OF IMPLEMENTATION PLANS**

##### **SUBPART S--INSPECTION/MAINTENANCE PROGRAM REQUIREMENTS**

---

#### **§ 51.366      Data analysis and reporting.**

Data analysis and reporting are required to allow for monitoring and evaluation of the program by program management and the Environmental Protection Agency (EPA), and shall provide information regarding the types of program activities performed and their final outcomes, including summary statistics and effectiveness evaluations of the enforcement mechanism, the quality assurance system, the quality control program, and the testing element. Initial submission of the following annual reports shall commence within 18 months of initial implementation of the program as required by Sec. 51.373 of this subpart. The biennial report shall commence within 30 months of initial implementation of the program as required by Sec. 51.373 of this subpart.

(a) **Test data report.** The program shall submit to EPA by July of each year a report providing basic statistics on the testing program for January through December of the previous year, including:

The following responses cover data gathered from January through December 2008.

**(1)      The number of vehicles tested by model year and vehicle type;**

See Attachment 1 – The number of vehicles tested by model year and vehicle type

**(2)      By model year and vehicle type, the number and percentage of vehicles:**

**(i)      Failing initially, per test type;**

See Attachment 2 – (2i) Vehicles Failing Initially

**(ii) Failing the first retest per test type;**

See Attachment 3 – (2ii) Vehicles Failing the First retest

**(iii) Passing the first retest per test type;**

See Attachment 4 – (2iii) Vehicles Passing the First retest

**(iv) Initially failed vehicles passing the second or subsequent retest per test type;**

See Attachment 5 – (2iv) Vehicles Passing the second or subsequent retest

**(v) Initially failed vehicles receiving a waiver; and**

See Attachment 6 – Initially Failed Vehicles Receiving a Waiver

**(vi) Vehicles with no known final outcome (regardless of reason).**

See Attachment 7 – (2vi) Vehicles with no known final outcome

**(vii) -(x) [Reserved]**

**(xi) Passing the on-board diagnostic check;**

See Attachment 8 -- (2xi-xii) Vehicles Passing/Failing the On-Board Diagnostic Test

**(xii) Failing the on-board diagnostic check;**

See Attachment 8 -- (2xi-xii) Vehicles Passing/Failing the On-Board Diagnostic Test

**(xiii) Failing the on-board diagnostic check and passing the tailpipe test (if applicable);**

N/A

**(xiv) Failing the on-board diagnostic check and failing the tailpipe test (if applicable);**

N/A

**(xv) Passing the on-board diagnostic check and failing the I/M gas cap evaporative system test (if applicable);**

N/A

**(xvi) Failing the on-board diagnostic check and passing the I/M gas cap evaporative system test (if applicable);**

N/A

**(xvii) Passing both the on-board diagnostic check and I/M gas cap evaporative system test (if applicable);**

N/A

**(xviii) Failing both the on-board diagnostic check and I/M gas cap evaporative system test (if applicable);**

N/A

**(xix) MIL is commanded on and no codes are stored;**

See Attachment 9-MIL is commanded on and no codes are stored

**(xx) MIL is not commanded on and codes are stored;**

See Attachment 10-MIL is not commanded on and codes are stored

**(xxi) MIL is commanded on and codes are stored;**

See Attachment 11-MIL is commanded on and codes are stored

**(xxii) MIL is not commanded on and codes are not stored;**

See Attachment 12-MIL is commanded on and codes are stored

**(xxiii) Readiness status indicates that the evaluation is not complete for any module supported by on-board diagnostic systems;**

See Attachment 13 – Vehicles Failing the Readiness Status

**(3) The initial test volume by model year and test station;**

See Attachment 14-Initial test volume by model year and test station

**(4) The initial test failure rate by model year and test station; and**

See Attachment 15--The initial test failure rate by model year and test station

**(5) The average increase or decrease in tailpipe emission levels for HC, CO, and NOx (if applicable) after repairs by model year and vehicle type for vehicles receiving a mass emissions test.**

N/A

**(b) *Quality assurance report.*** The program shall submit to EPA by July of each year a report providing basic statistics on the quality assurance program for January through December of the previous year, including:

**(1) The number of inspection stations and lanes:**

**(i) Operating throughout the year;**

There were 657 GVIP licensed stations in operation for at least 10 months out of 2008. Missouri's GVIP tracks the number of inspection units, called Missouri Decentralized Analyzer Systems (MDAS units) at an inspection facility but does not maintain records on the number of public test station lanes. Missouri State Highway Patrol (MSHP)-MVI has determined that the Safety Inspection does not need to be done in the lane with the MDAS unit, and, as a consequence, for stations with a wireless OBD system, neither do the Emissions Inspections. In addition, each lane at a facility may not have an MDAS unit. For these reasons, the number of lanes at a station is no longer relevant information while the number of inspection units is. There were 873 MDAS units in operation at the end of 2008.

**(ii) Operating for only part of the year;**

In addition to the stations noted above there were 141 GVIP licensed stations that operated less than 10 months out of the year.

**(2) The number of inspection stations and lanes operating throughout the year:**

**(i) Receiving overt performance audits in the year;**

2129 overt audits of GVIP stations were performed in 2008. Of these the Department performed 351 and 1778 were performed by the MSHP. Each station audit included audits of all inspection units at the station.

**(ii) Not receiving overt performance audits in the year;**

All stations received overt performance audits during this period.

**(iii) Receiving covert performance audits in the year;**

115 covert audits of licensed stations were performed in 2008. The Department performed 23 of these and MSHP performed 92. In addition to the above, while they were not documented appropriately or counted as covert audits, the Department did conduct data investigation regarding various aspects of the GVIP, such as Vehicle Identification Number (VIN) mismatches, multiple 'readiness monitor fails' on the same vehicle; and 'Repair Verification' action regarding problem waivers. The Department has addressed active tracking of these items for 2009.

**(iv) Not receiving covert performance audits in the year; and**

Of the 657 stations that were in operation more than 10 months out of the year, 542 stations did not receive a documented covert audit.

**(v) That have been shut down as a result of overt performance audits;**

13 inspection stations had licenses suspended as a result of overt audits and 9 stations had their licenses revoked as a result of overt audits. In addition, 52 stations have been locked out for various equipment violations discovered during overt audits until the equipment was repaired. At present, we do not lock down individual units at a station so if a station has been shut down it included all units at that station.

**(2) The number of covert audits:**

We are unable to provide MSHP data specific to items (i.) through (iv) below

**(i) Conducted with the vehicle set to fail per test type;**

The Department performed 16 covert audits with the vehicle set to fail OBD test type only in 2008.

**(ii) Conducted with the vehicle set to fail any combination of two or more test types;**

The Department performed 4 covert audits with the vehicle set to fail any combination of two or more test types in 2008. One of the covert vehicles is set up to fail Safety inspection for the catalytic converter missing.

**(iii) Resulting in a false pass per test type;**

2 covert audits resulted in a false pass in 2008. In both instances, the vehicle received a Safety Inspection Pass with the missing catalytic converter

**(iv) Resulting in a false pass for any combination of two or more test types;**

None of the Department covert audits resulted in a false pass for any combination of two or more test types in 2008.

**(v) - (viii) [Reserved]**

**(4) The number of inspectors and stations:**

- (i) That were suspended, fired, or otherwise prohibited from testing as a result of covert audits;**

All suspensions and revocations were the result of overt audits.

- (ii) That were suspended, fired, or otherwise prohibited from testing for other causes; and**

As stated above, 22 stations either had their license suspended or revoked in 2008 and the MSHP issued an additional 52 station lockouts for equipment violations. 23 individual Inspector/Mechanics had their licenses suspended and another 48 had their licenses revoked from testing in 2008 as a result of overt audits. In addition, the MSHP issued written warnings to 75 Inspector/Mechanics during the reporting period.

- (iii) That received fines;**

Fines are typically not assessed under the GVIP program.

**(5) The number of inspectors licensed or certified to conduct testing;**

On December 31, 2008, 3410 inspectors were licensed to conduct testing under the GVIP program.

**(6) The number of hearings:**

- (i) Held to consider adverse actions against inspectors and stations; and**

The MSHP conducted one hearing with an Inspector/Mechanic for a "clean scan" violation.

In addition 3 joint investigations of "clean scan" violations resulted in Federal Prosecution.

- (ii) Resulting in adverse actions against inspectors and stations;**

All of the above resulted in adverse actions against the involved parties. The MSHP hearing resulted in a revocation of the Inspector/Mechanic's license. As a result of the federal prosecutions, in addition to license revocation, one Inspector/Mechanic was sentenced to 10 months in federal prison, one Inspector/Mechanic was placed on probation, and the third Inspector/Mechanic is scheduled for sentencing September 14, 2009.

- (7) **The total amount collected in fines from inspectors and stations by type of violation;**

Fines are typically not assessed under the GVIP program however, there may be fines associated with the federal prosecutions mentioned above. This information is unavailable.

- (8) **The total number of covert vehicles available for undercover audits over the year; and**

There were 6 Department owned vehicles and 5 MSHP vehicles used to perform covert audits this reporting period.

- (9) **The number of covert auditors available for undercover audits.**

During this reporting period, the department had 5 staff members available for covert audits. The MSHP had 15 staff available to perform covert audits.

- (c) ***Quality control report.* The program shall submit to EPA by July of each year a report providing basic statistics on the quality control program for January through December of the previous year, including:**

- (1) **The number of emission testing sites and lanes in use in the program;**

On December 31, 2008, there were 707 GVIP licensed stations and 873 MDAS units in operation.

- (2) **The number of equipment audits by station and lane;**

The Department's staff conducted equipment audits at 379 stations and of approximately 474 MDAS units. In addition, Department auditors routinely audit software. They assist in development of acceptance test procedures; participate in acceptance testing on all software versions released during the calendar year. They provide approval or request additional modifications as appropriate.

All overt audits conducted by the MSHP are also equipment audits. MSHP conducted 1778 station audits.

- (3) **The number and percentage of stations that have failed equipment audits; and**

52 stations have failed inspections for equipment violations. This equates to approximately 6.5% of stations.

- (4) **Number and percentage of stations and lanes shut down as a result of equipment audits.**

52 stations were locked down until the equipment was fixed as a result of equipment audits.

(d) ***Enforcement report.***

- (1) **All varieties of enforcement programs shall, at a minimum, submit to EPA by July of each year a report providing basic statistics on the enforcement program for January through December of the previous year, including:**

- (i) **An estimate of the number of vehicles subject to the inspection program, including the results of an analysis of the registration database;**

According to a May 2009 analysis of the Department of Revenue's vehicle registration database the Department estimated that 1,367,314 vehicles were subject to the Gateway Clean Air Program.

- (ii) **The percentage of motorist compliance based upon a comparison of the number of valid final tests with the number of subject vehicles;**

For the reporting year, 690,516 initial emission tests were performed. These tests include vehicle transfers (used vehicles sold and required to be reinspected) and some federal, state and local government fleet vehicles that are not on the registration database (fewer than 3,000).

Assuming that roughly half of the 1,367,314 vehicles should be emission inspected during each year of the Gateway Clean Air Program, then 683,657 vehicles should have received an emission test, assuming no vehicles are sold to a new owner. Since 690,516 vehicles were tested, the percentage of motorist compliance is estimated to be 101 percent. The majority of additional tests are assumed to be made up of transfer of ownership vehicles.

- (iii) **The total number of compliance documents issued to inspection stations;**

All compliance documents are stored on the MDAS unit. Because of this feature, they are printed on an as required basis so the number issued would correlate directly to the number of inspections performed or passed as appropriate.

- (iv) **The number of missing compliance documents;**

Because stations are only able to print compliance documents as they are needed none are missing.

- (v) **The number of time extensions and other exemptions granted to motorists; and**

**Cost-based emissions waivers** are available if a motorist has spent more than \$450 on emissions-related repairs and labor if a Missouri Recognized Repair Technician performs the repairs. If the vehicle owner performs the repairs, the owner must spend at least \$400 in qualified emissions-control parts, as determined by the EPA, toward the waiver amount. If vehicle owners are financially dependent solely on state and federal disability, benefits or other public assistance programs and anticipate failing the emissions test, they may receive a waiver if they spend at least \$200 on emissions-related repairs and labor. The Department granted 559 cost based waivers in 2008.

**Out-of-area waivers** are also available. If a vehicle is registered in the St. Louis ozone nonattainment area, but operating outside of that area for the next 24 consecutive months, owners may apply to the department for an out-of-area waiver. Examples include vehicles used by family members away at college or on farm property outside of the St. Louis area. Out of Area Waivers, valid for the period of registration, are given to motorists of such vehicles. During the reporting period, 309 Out of Area Waivers were granted by the Department to vehicles from the enhanced area.

**Reciprocity waivers** are also available. If a vehicle is in a state other than Missouri and that state conducts pass/fail OBD testing, the motorist may choose to have the vehicle emissions inspected in that state and submit a reciprocity waiver application to the department. The Department granted 192 Reciprocity waivers for the reporting period.

**Mileage-Based Exemption Requests are available.** There are 3 categories of motor vehicles eligible for mileage-based exemptions. New motor vehicles, of model years of the current calendar year and within two (2) years of the current calendar year that have an odometer reading of fewer than 6,000 miles at the time of original sale by a motor vehicle manufacturer or licensed motor vehicle dealer to the first user, New motor vehicles that have not been previously titled and registered, for the 4-year period following their model year of manufacture, that have an odometer reading of fewer than 40,000 miles showing at the first required biennial safety inspection and motor vehicles that are driven fewer than 12,000 miles between biennial safety inspections. During 2008, the Department granted 2,071 mileage-based exemptions.

- (vi) **The number of compliance surveys conducted, number of vehicles surveyed in each, and the compliance rates found.**

No parking lot surveys or other compliance checks were conducted during the reporting period.

- (2) **Registration denial based enforcement programs shall provide the following additional information:**

- (i) **A report of the program's efforts and actions to prevent motorists from falsely registering vehicles out of the program area or falsely changing fuel type or weight class on the vehicle registration, and the results of special studies to investigate the frequency of such activity; and**

*Real Time Inspection Data/Paperless Inspection Verification*

Each MDAS unit is connected to the VID using a dedicated Internet connection at the inspection station. At the completion of each vehicle inspection, the MDAS software automatically uploads the inspection data to the VID, where it then becomes immediately available to the Department of Revenue contract license offices and online registration system for inspection verification. As a result of this real time paperless inspection verification system, GVIP has simplified registration verification and increased registration integrity for St. Louis area Department of Revenue contract license offices. Contract license offices now have the ability to quickly identify fraudulent vehicle inspection reports (VIRs) that motorists attempt to use to bypass the vehicle inspection requirements. Contract license offices now contact DEQ as soon as such attempts have been prevented so that the department and MSHP can initiate immediate investigation of the source of these fraudulent VIRs.

In addition to the ability to use real time inspection data and paperless verification, the GVIP program utilized Sierra Look-Up Table data and POLK VIN Decode data to define the vehicle for the inspector, including the GVWR and fuel type. Inspectors wanting to change the data provided needed to acquire their station manager's authorization to do so. The Department of Revenue has a data sheet regarding manufacturer types and weight classifications based on VIN that is also used.

- (ii) **The number of registration file audits, number of registrations reviewed, and compliance rates found in such audits.**

The Department did not audit or review any registration files during this reporting period.

- (3) **Computer-matching based enforcement programs shall provide the following additional information:**

The Gateway Clean Air Program is primarily enforced with a registration denial based program rather than a computer-matching system. However, we do have the ability to implement some computer-matching based measures as well.

- (i) **The number and percentage of subject vehicles that were tested by the initial deadline, and by other milestones in the cycle;**

Vehicles may be inspected, and if passing, renew their registration up to 6 months prior to their registration renewal deadline however we have not devised an accurate method for determining compliance with this requirement.

- (ii) **A report on the program's efforts to detect and enforce against motorists falsely changing vehicle classifications to circumvent program requirements, and the frequency of this type of activity; and**

The system utilizes the Sierra Look-Up Table and POLK to decode the VIN and define the vehicle. Changes to GVWR or fuel type require station management approval.

- (iii) **The number of enforcement system audits and the error rate found during those audits.**

No audits have been done to compare the actual number vehicles tested and passed or waived with the actual number of OBD emission inspections required vehicles that were registered.

- (4) **Sticker-based enforcement systems shall provide the following additional information:**

The Gateway Clean Air Program is not enforced with a sticker-based system. Although a windshield sticker is issued to any vehicle that passes an emissions test or receives a waiver, the stickers are not currently used as an enforcement tool.

- (i) **A report on the program's efforts to prevent, detect, and enforce against sticker theft and counterfeiting, and the frequency of this type of activity;**
  - (ii) **A report on the program's efforts to detect and enforce against motorists falsely changing vehicle classifications to circumvent program requirements, and the frequency of this type of activity; and**
  - (iii) **The number of parking lot sticker audits conducted, the number of vehicles surveyed in each, and the noncompliance rate found during those audits.**
- (e) ***Additional reporting requirements.* In addition to the annual reports in paragraphs (a) through (d) of this section, programs shall submit to EPA by July of every other year, biennial reports addressing:**
    - (1) **Any changes made in program design, funding, personnel levels, procedures, regulations, and legal authority, with detailed discussion and evaluation of the impact on the program of all such changes; and**

In the summer of 2005, the Department and the St. Louis community formed an I/M Summit to consider and build consensus for a redesign of the vehicle emissions I/M program. Based upon the consensus of the I/M Summit, the Missouri General Assembly passed Senate Bill 583 in 2006. As a result of this legislation, the centralized Gateway Clean Air Program (GCAP) was replaced by the decentralized Gateway Vehicle Inspection Program (GVIP). The GVIP officially began on September 1, 2007, with vehicle inspections beginning October 1, 2007.

The GVIP is a combined emission and safety inspection program for vehicles registered in the St. Louis ozone nonattainment area. Under the GVIP, all 1996 and newer gas-powered vehicles and 1997 and newer diesel-powered vehicles with a Gross Vehicle Weight Rating of 8,500 pounds or less that are registered in the St. Louis nonattainment area will be subject to an emissions test and safety inspection at department specified intervals. A summary of the major differences in the two programs is provided in the table below.

GCAP	GVIP
Two program areas, Enhanced and Basic	Same Basic I/M program in all five counties
Emissions testing separate from Safety testing	Emissions testing combined with Safety testing
Enhanced area tests conducted at 10 test-only stations: Franklin County 2 fixed and 2 mobile test only stations	Emissions and safety tests conducted at hundreds of licensed test-and-repair or test-only stations
Only gasoline powered vehicles subject to testing	1997 Light duty diesel now tested
1982-1995 model years tested with IM240 transient tailpipe test	1982-1995 model years no longer emissions tested
1996-2007 model years tested with On-Board Diagnostics (OBD) test	1996-2007 model years still tested with OBD test
All model years receive a gas cap pressure test	No gas cap pressure test
Franklin County tests 1982+ model years with single speed idle and gas cap tests,	Same as above
If vehicle fails, it can't be repaired by test station	At test-and-repair stations, if vehicle fails, it can be repaired by test station
Failing vehicles had unlimited free retests at any test station for 30 days	Failing vehicles have one free retest at station that conducted initial inspection if within 20 business days of initial test
Not Ready vehicles have unlimited free retests for 60 days from first Reject test result	Not Ready vehicles fail the emissions test, allowed only one free retest
RapidScreen exempts cleanest 20-25% of volume from test stations	RapidScreen eliminated
Paper report witnessed by vehicle registration agency	Electronic proof witnessed by vehicle registration agency

Since the implementation of the new program, other changes have taken place. 2008 and 2009 changes include:

The Governor signed Senate Bill 936 into law on July 10, 2008, and it became effective on August 28, 2008. The law allows vehicles that fail the OBD test for unset readiness monitors to drive their vehicles with expired license plates for an additional 30 days for the purposes of resetting their unset readiness monitors.

An amendment to 10 CSR 10-5.381 On-Board Diagnostics Vehicle Emissions Inspection was adopted on February 5, 2009, and became effective on May 30, 2009. The amendment includes the above statutory change and includes an exemption for specially constructed vehicles.

On May 12, 2009, House Bill 683 was adopted and truly agreed upon. This bill modifies several provisions of law relating to transportation. It included an amendment regarding

motor vehicle safety inspection. This act exempts motor vehicles for the five-year period following their model year of manufacture from the state motor vehicle safety inspection under certain conditions. This will affect the businesses who offer both safety and emissions inspections. The program could potentially see some adverse reactions from the shops who feel they may lose business. Also, it affects the convenience aspect of the inspections as emissions inspections are due every two years and this requirement is on an odd cycle, so affected motorists will be required to make two stops in two years rather than going for "one-stop" testing every two years to fulfill their requirements.

**(2) Any weaknesses or problems identified in the program within the two-year reporting period, what steps have already been taken to correct those problems, the results of those steps, and any future efforts planned.**

One weakness we have identified is our tracking of audits. While we were very accurately tracking physical audits of the GVIP stations the Department did not accurately track data investigation regarding various aspects of the GVIP, such as VIN mismatches, multiple 'readiness monitor fails' on the same vehicle; 'Repair Verification' action regarding problem waivers. A system for better tracking these types of audits has been implemented and these types of audits will be included in future reports.

While they were not necessarily identified as weaknesses, the Department continually strives to improve our ability to detect fraud and ensure data integrity. Some of these improvements include:

A report that allows an accurate assessment of the frequency a station or technician has an emission test that shows VIN mismatch (VIN entered by a technician vs. VIN electronically reported by vehicle)

A report (still in development) that allows an assessment of changes in protocol or monitor status (from supported to unsupported) that can indicate a different vehicle was potentially tested in place of the correct vehicle.

VIN decoding is now occurring using a VIN decode program, as opposed to a vehicle look up table program, which enhances the accuracy of the vehicle data in the database, in turn allowing a more accurate assessment of whether an issue is a vehicle or software/hardware issue.

A matrix for requiring a catalytic converter monitor to 'fail' based on previous catalytic converter diagnostic trouble codes (DTC) is being utilized to prevent motorists from clearing out the vehicle's computer memory of a catalytic converter DTC, and retesting without the catalytic converter monitor being set to 'Completed' (which would verify the cat DTC is no longer present.) This prevents a motorist from receiving an OBD pass because the required number of readiness monitors to pass that part of the test has been met without the catalytic converter monitor being reset or any repairs to the catalytic converter being documented or made.

**(f) *SIP requirements.* The SIP shall describe the types of data to be collected.**

The St. Louis area I/M SIP was initially approved by the EPA on May 18, 2000, and revisions approved on May 12, 2003 and on May 13, 2004. The Department submitted the

most recent I/M SIP amendment to the EPA on December 7, 2007. On April 15, 2008, the EPA found the I/M SIP submittal to be both administratively and technically complete. A technical support document for the recent rule revision was submitted on June 10, 2009.
